The Agri-Days program is provided free of charge and is presented by local agriculture producers who volunteer their time to share their work with students in your classroom.

Our full program provides up to three (3) presentations in a rotation and workshop format. Single topic presentations are also available.

The presentations are curriculum based and are designed to provide an interactive and hands-on experience for students and teachers. We encourage you to involve the whole school or as many classes as are interested.

Once date is confirmed we ask that you prepare a schedule for the presentation(s) that fits within your regular school day.
